

The
TOILET TOLL

Please spend a penny and flush away poverty
THANK YOU

www.toilettwinning.org

Nearly 40% of the world's population don't have somewhere safe to go to the toilet. Every 20 seconds a child dies from diarrhoeal diseases.

Investing in sanitation is one of the most cost-effective forms of aid. For every £1 spent on water and sanitation programmes £5.50 is returned through saved time, reduced health costs and increased productivity.*
