

4 Balls in a Bowl

This is harder than it looks. See how many balls you can land in your target but be warned: they have a nasty habit of bouncing back out!

You will need:

Ten table tennis balls	A bowl, toilet or potty
------------------------	-------------------------

How to play:

Set up a bowl or toilet-themed receptacle (eg clean potty or toilet) on the floor.

Practise beforehand to see what distance it is reasonable to expect players to throw. Bear in mind that the balls are very bouncy and unpredictable. Two metres may well be far enough away!

Players take it in turn to throw ten balls and the winner is the one who lands the most in the bowl. If you have two or more winners from the first round, have a knockout round: give them each three balls and see who lands most in the bowl this time!
